

# **MOOC : Managing Urban Infrastructures**

This course is about the management of urban infrastructures in the age of global challenges that affect cities

It is structured into four blocks:

1. Introduction to urban infrastructures
2. Foundations of managing urban infrastructure systems
3. Managing urban energy infrastructures
4. Managing urban transport infrastructures

In this first block you will learn about the main urban infrastructure systems and the challenges they are confronted with.

The block is structured into the five sessions:

1. A general introduction
2. The main urban infrastructure systems
3. The main dimensions of urban infrastructures
4. The point of view of a practitioner
5. The main analytical perspectives for approaching urban infrastructures
